

Mounting advice

1. Drop shape and coat-of-arms shape for deer and fallow deer

Drop shape and coat-of-arms shape are factory equipped with a \varnothing 12 mm punched hole for installation of a wall mount. We recommend to mount the antlers on the trophy slate by using three screws, the hole pattern depends on the size of the skull. Please drill the necessary holes with a stone drill \varnothing 6 mm from the front of the trophy slate. Do only impose low pressure.

2. Drop shape and coat-of-arms shape for roe deer – all sizes

All sizes of drop shape and coat-of-arms shape for roe deer are delivered with two punched holes. One serves for the wall mount the others serve for the installation of a regular antler bracket.

3. Boar plate

Boar plates are delivered with one hole for installation of a wall mount. The boar tusks can be attached by using a regular glue.
